Narrative

ld 3: ALL

This report combines three criteria in one report: it shows the number of uses per type of species of animals broken down by the primary purpose and the level of actual severity experienced by the animal.

It shows both the first and all the subsequent uses of the animals completed in the reporting period (unless either option is specifically excluded in the data filtering criteria when selecting the report).

Due to the large size of the report, it is best viewed in A3 format. Equally, the columns for which there has been no animal use are omitted from the report.
